Map view automatically scales to show closest 5-10 in the vacinity of the given location. Presumption is that a suitable parking space would be available from these results.

Map search view

Pinch/zoom the map as normal. If a single space is isolated, then a basic info panel appears on screen.

Either tapping on a space pin in map view, or pulling the white info panel as seen previously, activates a secondary information state.

Large book button and clarification of time for booking. This also gives access should the start time need to be altered.
